(GSPY)

Gotham Enhanced 500 ETF

Listed on NYSE Arca, Inc.

December 20, 2022

**Supplement to the
Summary Prospectus, Prospectus, and Statement of Additional Information (“SAI”),
each dated January 28, 2022, as supplemented**

Effective immediately, the last paragraph under the “Principal Investment Strategies” section on page 2 of the Summary Prospectus and page 2 of the Prospectus is replaced with the following:

The Fund is rebalanced daily in order to manage risk and reposition the portfolio to reflect earnings releases, stock price movements, and other new information related to particular companies.

The following risk disclosure is also added on page 3 of the Summary Prospectus and pages 3 and 7 of the Prospectus:

High Portfolio Turnover Risk. The Fund may actively and frequently trade all or a significant portion of the securities in its portfolio. A high portfolio turnover rate increases transaction costs, which may increase the Fund’s expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

In addition, the address for Gotham Asset Management, LLC, the investment sub-adviser (the “Sub-Adviser”) to the Gotham Enhanced 500 ETF, is as follows:

825 Third Avenue, Suite 1750
New York, NY 10022

References to the Sub-Adviser’s address within the Prospectus and SAI are hereby replaced with the above.

Please retain this Supplement for future reference.

Before you invest, you may want to review the Gotham Enhanced 500 ETF's (the "Fund") statutory prospectus and statement of additional information, which contain more information about the Fund and its risks. The current statutory prospectus and statement of additional information dated January 28, 2022, are incorporated by reference into this Summary Prospectus. You can find the Fund's statutory prospectus, statement of additional information, reports to shareholders, and other information about the Fund online at www.GothamETFs.com/GSPY. You can also get this information at no cost by calling 855-998-4779 or by sending an e-mail request to info@gothametfs.com.

Investment Objective

The Gotham Enhanced 500 ETF (the "Fund") seeks long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund ("Shares"). You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.65%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.65%
Less: Fee Waiver	(0.15)%
Total Annual Fund Operating Expenses After Fee Waiver¹	0.50%

¹ The Fund's investment adviser, Toroso Investments, LLC (the "Adviser"), has agreed to reduce its unitary management fee (which includes all expenses incurred by the Fund except for interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, and the unified management fee payable to the Adviser (collectively, the "Excluded Expenses") to 0.50% of the Fund's average daily net assets through at least December 31, 2023. To the extent the Fund incurs Excluded Expenses, Total Annual Fund Operating Expenses After Fee Waiver will be greater than 0.50%. This agreement may be terminated only by, or with the consent of, the Board of Trustees (the "Board") of Tidal ETF Trust (the "Trust"), on behalf of the Fund, upon sixty (60) days' written notice to the Adviser. This Agreement may not be terminated by the Adviser without the consent of the Board.

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. The management fee waiver discussed above is reflected only through December 31, 2023. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$51	\$177	\$332	\$781

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the expense example above, affect the Fund’s performance. For the fiscal period December 28, 2020 (commencement of operations) to September 30, 2021, the Fund’s portfolio turnover rate was 36% of the average value of its portfolio.

Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund (“ETF”) that seeks to achieve its investment objective by generally investing in securities of issuers included in the S&P 500[®] Index (the “Index”). The Fund is not a passive index fund, but instead utilizes an “enhanced” strategy implemented by Gotham Asset Management, LLC, the Fund’s investment sub-adviser (“Gotham” or the “Sub-Adviser”), to invest in the securities in the Index and weight those securities based on the Sub-Adviser’s assessment of value and each security’s weight in the Index.

The Sub-Adviser seeks to capitalize on pricing inefficiencies in the market by employing a systematic, bottom-up, valuation approach based on the Sub-Adviser’s proprietary analytical framework to identify companies included in the Index that appear to be undervalued or overvalued on both an absolute and relative basis. This approach consists of:

- Researching and analyzing each company in the Sub-Adviser’s coverage universe according to a methodology that emphasizes fundamentals such as recurring earnings, cash flows, capital efficiency, capital structure, and valuation;
- Identifying and excluding companies that do not conform to the Sub-Adviser’s valuation methodology or companies judged by the Sub-Adviser to have questionable financial reporting;
- Updating the analysis for earning releases, annual (Form 10-K), and quarterly (Form 10-Q) reports and other corporate filings; and
- Recording analysis in a centralized database enabling the Sub-Adviser to compare companies and identify securities to purchase long based on the Sub-Adviser’s assessment of value.

The Fund is rebalanced periodically, including to manage risk and reposition the portfolio to reflect earnings releases, stock price movements, and other new information related to particular companies.

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return, and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Fund - Principal Risks of Investing in the Fund.”

Equity Market Risk. The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks, such as those held by the Fund, are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers. Securities in the Fund’s portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors. Factors that could impact the market value of an equity security include a company’s business performance, investor perceptions, stock market trends and general economic conditions.

General Market Risk. Securities markets and individual securities may increase or decrease in value. Security prices may fluctuate widely over short or extended periods in response to market or economic news and conditions, and securities markets also tend to move in cycles. If there is a general decline in the securities markets, it is possible your investment may lose value regardless of the individual results of the companies in which the Fund invests. The magnitude of up and down price or market fluctuations over time is sometimes referred to as “volatility”, and it can be significant. In addition, different asset classes and geographic markets may experience periods of significant correlation with each other. As a result of this correlation, the securities and markets in which the Fund invests may experience volatility due to market, economic, political or social events and conditions that may not readily appear to directly relate to such securities, the securities’ issuer or the markets in which they trade.

Value Style Risk. The Sub-Adviser intends to buy securities, on behalf of the Fund, that it believes are undervalued. Investing in “value” stocks presents the risk that the stocks may never reach what the Sub-Adviser believes are their full market values, either because the market fails to recognize what the Sub-Adviser considers to be the companies’ true business values or because the Sub-Adviser misjudges those values. In addition, value stocks may fall out of favor with investors and underperform other stocks (such as growth stocks) during given periods.

Risks Related to Database Errors. The investment strategy used by the Sub-Adviser relies on proprietary databases and third-party data sources. Data entries made by the Sub-Adviser’s team of financial analysts or third parties may contain errors, as may the database system used to store such data. Any errors in the underlying data sources, data entry or database may result in the Fund acquiring or selling investments based on incorrect information.

Systems Risk. The Fund depends on the Sub-Adviser to develop and implement appropriate systems to provide sub-advisory services. The Sub-Adviser relies extensively on computer programs and systems to implement and monitor the Fund’s investment strategy. As a result, there is a risk of human or technological errors affecting the portfolio construction process and order origination, including errors in programming (e.g., “bugs” and classic coding errors), modeling, design, translational errors and compatibility issues with data sets and among systems. There can be no guarantee that such defects or issues will be identified in time to avoid a material adverse effect on the Fund.

Large-Capitalization Investing Risk. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Sub-Adviser’s success or failure to implement investment strategies for the Fund. In addition as an actively-managed fund, the Fund’s investment exposure to individual securities will not match those of the Index and the Fund’s performance may not correlate with the performance of the Index.

Recently Organized Fund Risk. The Fund is newer, with limited operating history. As a result, prospective investors do not have a long-term track record or history on which to base their investment decision.

Recent Market Events Risk. U.S. and international markets have experienced significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including the impact of COVID-19 as a global pandemic, which has resulted in a public health crisis, disruptions to business operations and supply chains, stress on the global healthcare system, growth concerns in the U.S. and overseas, staffing shortages and the inability to meet consumer demand, and widespread concern and uncertainty. The global recovery from COVID-19 is proceeding at slower than expected rates due to the emergence of variant strains and may last for an extended period of time. Continuing uncertainties regarding interest rates, political events, rising government debt in the U.S. and trade tensions also contribute to market volatility.

ETF Risks.

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as “Authorized Participants” or “APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to

perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

- *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
- *Trading.* Although Shares are listed on a national securities exchange, such as the NYSE Arca, Inc. (the "Exchange"), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares.

Performance

The following performance information provides some indication of the risks of investing in the Fund by showing changes in the Fund's performance. The bar chart shows the Fund's performance for the calendar year ended December 31, 2021. The table illustrates how the Fund's average annual returns for the 1-year and since inception periods compare with those of a broad measure of market performance. The Fund's past performance, before and after taxes, does not necessarily indicate how it will perform in the future. Updated performance information is available on the Fund's website at www.GothamETFs.com/GSPY.

During the period of time shown in the bar chart, the Fund's highest quarterly return was 10.70% for the quarter ended December 31, 2021 and the lowest quarterly return was -0.12% for the quarter ended September 30, 2021.

**Average Annual Total Returns
For the Periods Ended December 31, 2021**

	1 Year	Since Inception December 28, 2020
Return Before Taxes	27.56%	27.64%
Return After Taxes on Distributions	27.49%	27.57%
Return After Taxes on Distributions and Sale of Fund Shares	16.37%	21.06%
S&P 500® Index (reflects no deduction for fees, expenses, or taxes)	28.71%	29.17%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates during the period covered by the table above and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Shares through tax-deferred arrangements such as an individual retirement account ("IRA") or other tax-advantaged accounts.

Management

Investment Adviser

Toroso Investments, LLC serves as investment adviser to the Fund.

Investment Sub-Adviser

Gotham Asset Management, LLC serves as investment sub-adviser to the Fund.

Portfolio Managers

Joel Greenblatt, Managing Principal and Co-Chief Investment Officer for the Sub-Adviser, has been a portfolio manager of the Fund since its inception in 2020.

Robert Goldstein, Managing Principal and Co-Chief Investment Officer for the Sub-Adviser, has been a portfolio manager of the Fund since its inception in 2020.

Michael Venuto, Chief Investment Officer for the Adviser, has been a portfolio manager of the Fund since its inception in 2020.

Charles A. Ragauss, CFA, Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since its inception in 2020.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the "Deposit Securities") and/or a designated amount of U.S. cash.

Shares are listed on a national securities exchange, such as the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the "bid" price) and the lowest price a seller is willing to accept for Shares (the "ask" price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the "bid-ask spread."

Recent information regarding the Fund's NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund's website at www.GothamETFs.com/GSPY.

Tax Information

Fund distributions are generally taxable to shareholders as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser, the Sub-Adviser, or their affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
